Technical Requirements

- Java SE 1.8 or newer
- Database: MySQL > 5.5 → Hibernate
- Spring Boot, Spring MVC, Spring Security
- Maven
- FreeMarker Template (FTL)
- Javascript/JQuery
- VCS: Git (Gitlab repositories)

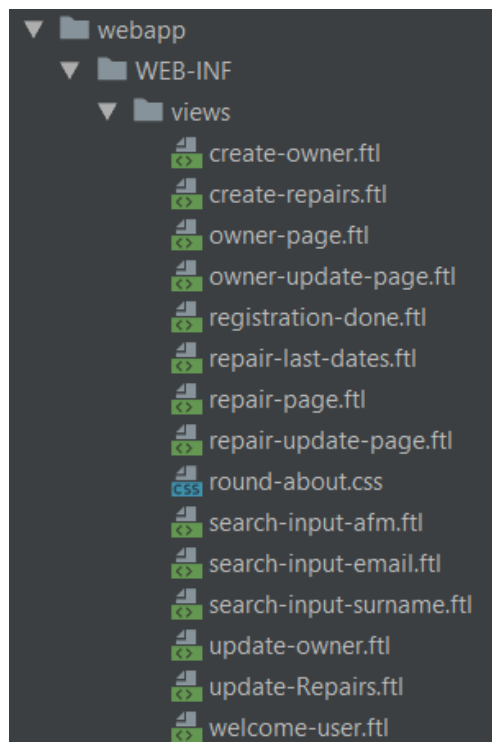

Figure 1 IntelliJ print screen regarding the FTL files used to our web application

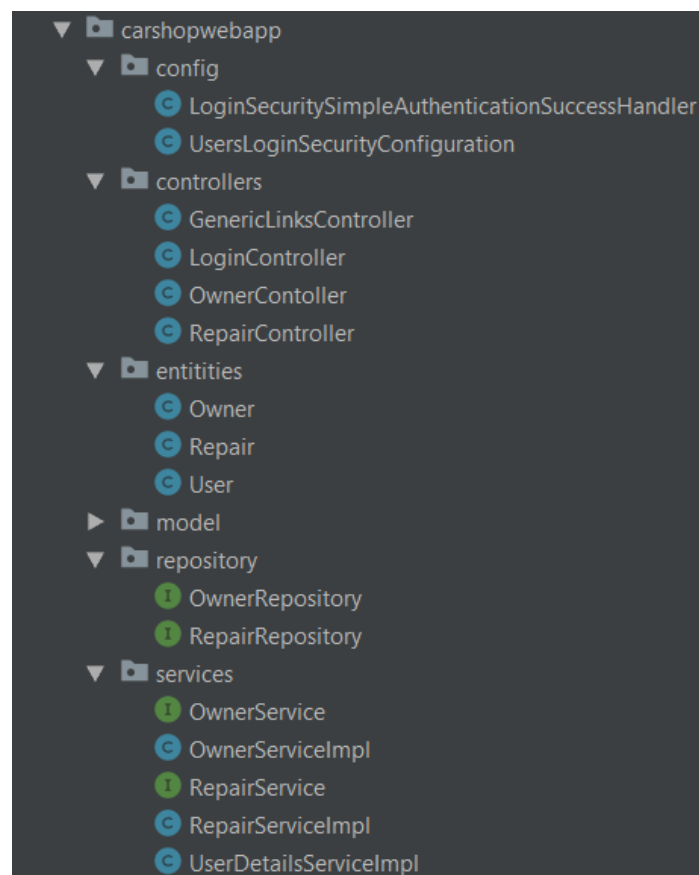

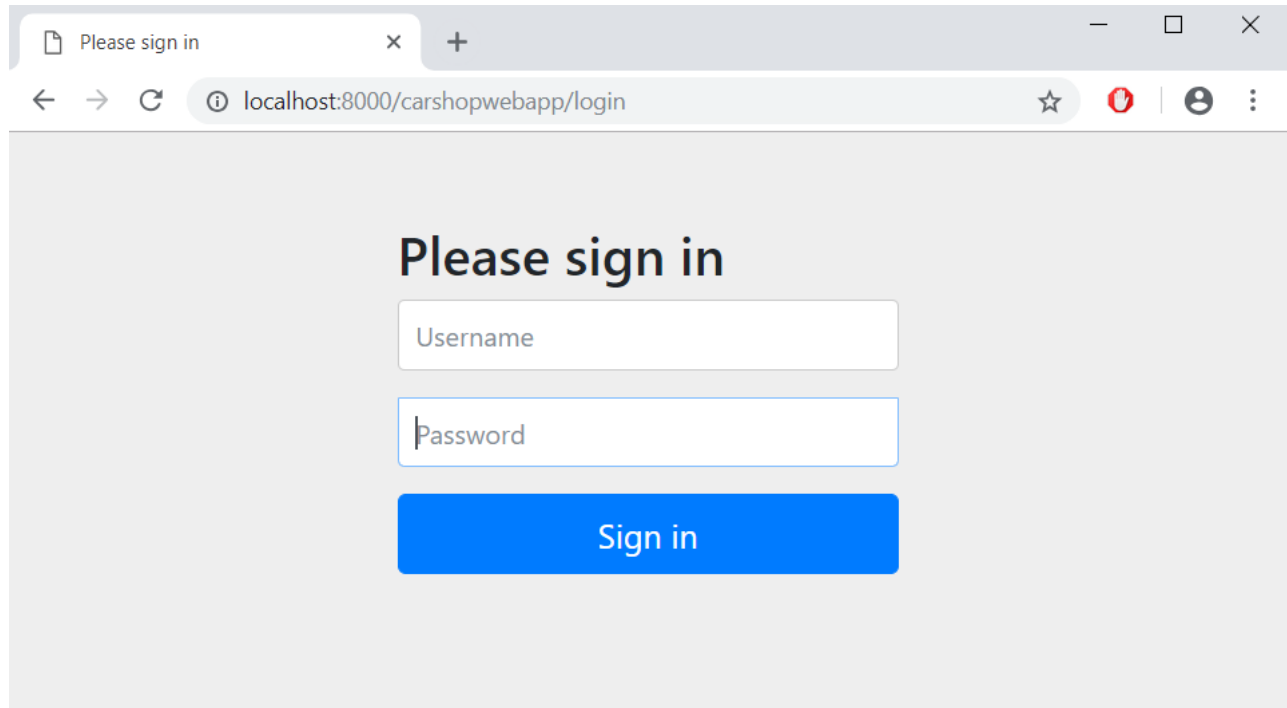

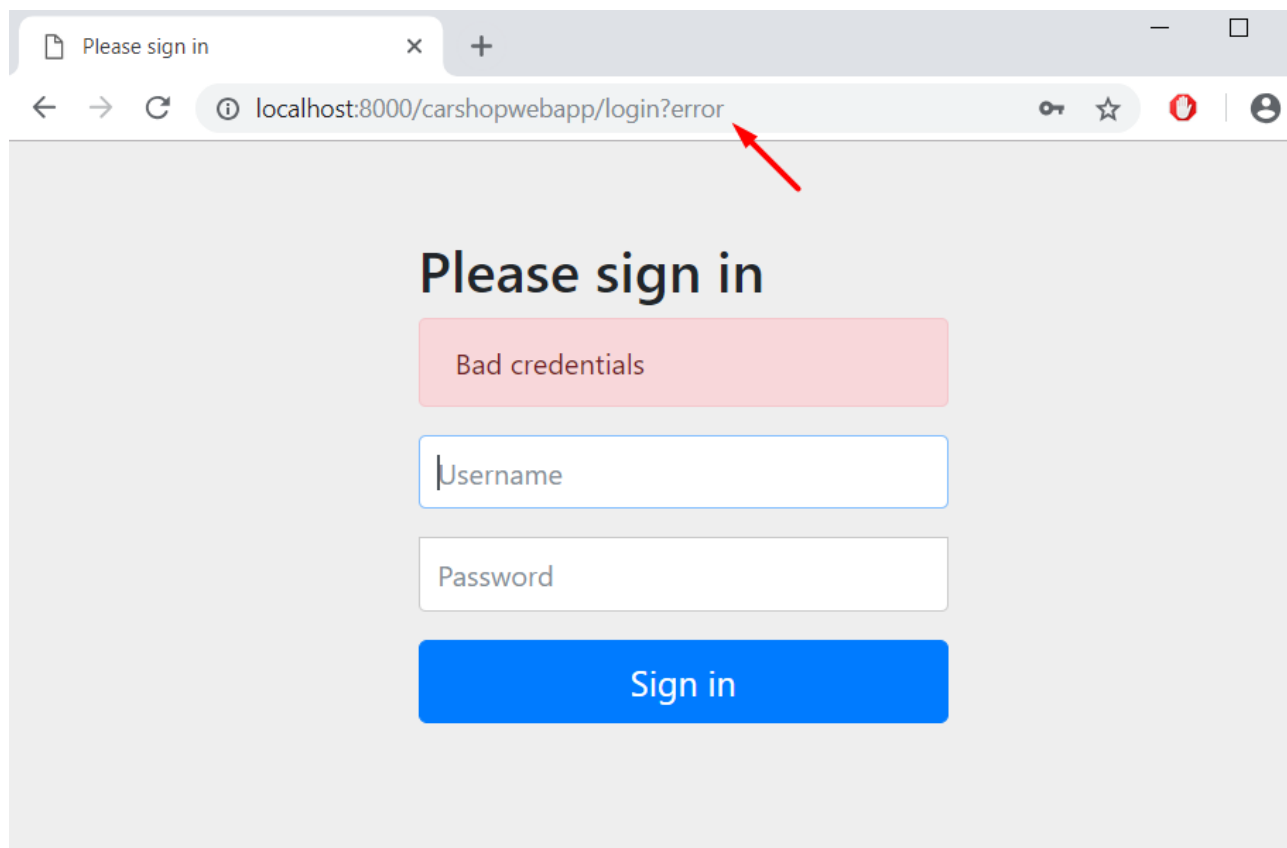

Figure 2 IntelliJ print screen of the main/java folder regarding the MVC structure used to our web application

A screenshot of a web browser window. The address bar shows 'localhost:8000/carshopwebapp/login'. The page has a light gray background. At the top, it says 'Please sign in' in a large, bold, black font. Below this, there are two input fields: 'Username' and 'Password'. The 'Password' field has a small blue outline. Below the input fields is a blue button with the text 'Sign in' in white.

Figure 3 Login Form in order to access the site

A screenshot of a web browser window. The address bar shows 'localhost:8000/carshopwebapp/login?error'. A red arrow points to the '?error' part of the URL. The page has a light gray background. At the top, it says 'Please sign in' in a large, bold, black font. Below this, there is a red rectangular box with the text 'Bad credentials' in black. Below the error message are two input fields: 'Username' and 'Password'. The 'Username' field has a small blue outline. Below the input fields is a blue button with the text 'Sign in' in white.
